Enterprise Carrier Services

A Better Way to Analyze, Design, Procure, and Manage all of your Voice, Data, and Internet Carrier Services.

The Network Challenge

Imagine a network that actually supports your strategic business goals; flawlessly converging voice, data, and video; scaling to support new applications like IP Telephony; extending capabilities to mobile staff, and, at the same time, reducing costs and eliminating complexity. **As the lifeblood of your business, the enterprise network is your key to profitability and growth.** However, too often, the network is a source of inefficiency and runaway costs; eroding bottom-line profits and constraining top-line growth: a barrier to success. And, as is common today, the resources to assess and transform do not exist internally.

The Network Solution

At Ronco Communications, we offer a team of certified Carrier Services Specialists. Through partnerships with world-class service providers, our team objectively evaluates, designs, recommends, and delivers the right network solution based on your unique needs and goals. **Our value to you is simple...we listen.** And, with 38 years of experience and thousands of satisfied customers, our ability to listen is only surpassed by our commitment to perform. Whether you desire simple cost-saving network advice, or a multi-site, multi-service end-to-end converged network design, you can rely on the Carrier Services Group at Ronco Communications.

Free Network Assessment (CIA) make informed decisions

Let our specialists analyze your current voice, data, and Internet services. Our goal is to give your business a competitive advantage through **cost savings, technology enablement, and efficiency improvements.**

Your CIA analysis includes specific recommendations tailored to your needs from providers you can trust.

Installation Management faster installs and trouble mgmt.

Our commitment is to proactively manage your services installation. Our specialists work directly with the vendors to ensure a provisioning cycle that is without administrative delays or unnecessary technical hang ups.

Ronco project management services may reduce installation times by as much as 30%.

Local Access Services

- International
- Toll Free
- Calling Cards

Equipment-for-Services (EFS) creative finance solutions

Working without a budget? Need to purchase equipment to improve your business? Let us explore an Equipment-for-Services solution.

EFS allows you to turn capital projects into operating expenses. Frequently, it allows us to subsidize a portion or all of a capital expense in return for a commitment to network services.

Service Renewal Tracking proactive account management

90, 60, & 30 day Renewal Reminders update you that a current contract is ending and eliminates costly auto renewals.

Our notification process allows time for renegotiation of rates, analysis of your current needs, and changes in your network design.
