

"Responder® NET gives me everything I need to accurately schedule and update assignments for every staff member – whether they are regular staff, contract or traveling nurses."

The NET Effect

Simple Sign-On and Staff Assignments

<< Simplifying staff assignments allows nursing personnel to devote their energies to patients. >>

Quick and Easy Staff Assignments

With turnover issues, contract nursing and other staff challenges, it is essential that scheduling systems offer ease of use. We've made the process of assigning patients as easy as it gets. The Staff Scheduler is a simple tool that lets charge nurses pre-assign staff to patients from any networked PC. The result? Less time with administration and more time with patients.

Speeds and Simplifies Staff Sign-On

The sign-on process just got easier. With a bar code reader and the ability to sign on from any networked PC, staff can quickly and easily sign in, view their patients and route calls to their wireless devices. There's no confusion or wasted time. No longer will staff crowd around the nurse's station to sign-on for their shift.

<< Responder® NET simplifies the staff assignment function and keeps everyone informed in real time >>

Staff Scheduler

- > Pre-assign rooms for current and future shifts - all on one screen.
- > No patient call is unanswered - all patients covered at all times.
- > Conveniently resides on any networked PC.
- > Printable schedule for entire floor or individual staff members.

Individual Sign On

- > Bar Code Reader speeds sign-on and eliminates errors.
- > Quick and simple - staff can get to their patients quicker at shift change.
- > Eliminates congestion at the nurses' station with sign-on at any networked PC.
- > Staff can view and print list of patients covered.
