

With Tracer IV Asset Tracking, locating equipment has never been easier

- Real-time display shows current location of all “tagged” equipment
- Stop wasting time searching for lost equipment
- Maximize utilization of equipment you own and minimize equipment rentals
- Equipment Location Reports assist in scheduling preventative equipment maintenance and analyzing equipment utilization

Tracer™ IV Asset Tracking: Real-Time Equipment Locating

Save time, money, and frustration by locating your key equipment – quickly and easily – using the Tracer IV Asset Tracking System.

One of the biggest wastes of hospital personnel’s time is searching for “lost” equipment. Hospital personnel just don’t have the time to continually search for portable equipment. The old solution has been to simply have more equipment available, but this is a very costly option. Instead of having to buy or lease more equipment, by attaching a small Tracer IV transmitter tag

to the key equipment you already own, you can easily locate equipment anywhere within the equipped portion of the facility.

The Tracer Location Tag emits an infrared signal that makes it possible for the Asset Tracking System to record the equipment’s real-time location, as well as uniquely identifying each piece of equipment. Sensors placed throughout the facility receive the signals from the tags and update the equipment’s location as it moves throughout the facility.

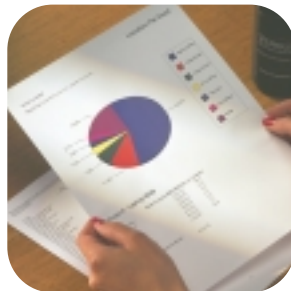

Through any computer on the hospital's network (running the Tracer IV Asset Tracking software), hospital personnel can instantly locate any piece of "tagged" equipment. Instead of hunting for the equipment, staff members can go directly to the equipment's location.

To analyze your equipment location and utilization, the Tracer IV Asset Tracking System also has the ability to produce equipment location reports. These reports detail how long the equipment was used or where it has traveled to over a period of time. When Biomedical Engineering needs to collect a piece of equipment for periodic maintenance, they can quickly locate the equipment and use the reports to see where the equipment has been.

Tracer™ IV Equipment Locating

Equipment	Manufacturer	Location	Status
End E 218	Rental	Room 1B1	Low
Pulse Ox E 8	Abbott	Central Utility 4 E	Good
IV Pmp E 200	Abbott	Central Supply	Good
Pat. Vent E 8	Edi	Room 4B2 W	Good
Pat. Vlay	GE	Radiol Storage 2	Good
IV Pmp E 15	Abbott	Central Supply 2	Good
IV Pmp E 75	Marquette	Nurses ST. 2 S	Good
Feed Pmp E 5	GE	Halway 2 S	Good
WFl Chair E 98	Rental	Main Entrance	Good
WFl Chair E 68	Rental	ER Entrance	Good
WFl Chair E 234	Rental	Nursing 5 2 S	Good
IV Pmp E 305	Marquette	Central Utility 5 N	Low
Suction Pmp E 87	Rental	Central Supply	Good

Record Count: 13

Features

- Fast, accurate equipment location that allows you to target a specific piece of equipment.
- Small, lightweight tags are unobtrusive and easy to affix to equipment.
- Takes advantage of Tracer's network approach. Locate equipment in any area of the hospital.
